PROFESSIONAL EXPERIENCE

Fullstack Developer
RALEx
2017 - Present

- Participated in the design and architectural decisions of software projects, ensuring scalability, reliability, and performance.
- Developed and implemented software solutions using multiple technologies such as AWS, Java, Spring Boot, JUnit, Mockito, JavaScript, Typescript, React, Node.js, MongoDB, Wordpress etc., while adhering to coding standards and best practices.
- Identified and resolved software defects and bugs by conducting debugging, unit testing, integration testing and root cause analysis.
- Utilized version control systems (Git) to manage codebase changes, collaborate with team members, and track project history.
- Designed, developed, and maintain databases, including SQL and NoSQL databases, to store and retrieve data efficiently.
- Designed and implemented REST API's for data exchange between different software components or services.
- Collaborated with cross-functional teams using Agile methodologies like Scrum or Kanban, including sprint planning, daily stand-ups, and retrospectives.
